

# Download File PDF Story Problems Book 1 Answer Key

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

NAME \_\_\_\_\_ DATE \_\_\_\_\_ PERIOD \_\_\_\_\_

**1-2 Word Problem Practice**  
**Order of Operations**

**1. SCHOOLS** Jefferson High School has 100 less than 5 times as many students as Yahi High School. Write and evaluate an expression to find the number of students at Jefferson High School if Yahi High School has 300 students.

**2. GEOGRAPHY** Granddope Peak in Texas has an altitude that is 675 feet more than double the altitude of Mount Sunflower in Kansas. Write and evaluate an expression for the altitude of Granddope Peak if Mount Sunflower has an altitude of 4039 feet.

**3. TRANSPORTATION** The Plead Taxi Cab Company charges \$1.75 per passenger plus \$2.45 per mile for trips less than 10 miles. Write and evaluate an expression to find the cost for Max to take a Plead taxi 6 miles to the airport.

**4. GEOMETRY** The area of a circle is related to the radius of the circle such that the product of the square of the radius and a number  $\pi$  gives the area. Write and evaluate an expression for the area of a circular pizza below. Approximate  $\pi$  as 3.14.

**5. BIOLOGY** Larazita is studying the growth of a population of fruit flies in her laboratory. She notices that the number of fruit flies in her experiment is five times as large after any six-day period. She observes 20 fruit flies on October 1. Write and evaluate an expression to predict the population of fruit flies Larazita will observe on October 31.

**CONSUMER SPENDING** For Exercises 6-8, use the following information:  
During a long weekend, Devon paid a total of 4 dollars for a rental car so he could visit his family. He rented the car for 4 days at a rate of \$39 per day. There was an additional charge of \$0.20 per mile after the first 200 miles driven.

**6.** Write an algebraic expression to represent the amount Devon paid for additional mileage only.

**7.** Write an algebraic expression to represent the number of miles over 200 miles that Devon drove the rental car.

**8.** How many miles did Devon drive overall if he paid a total of \$174 for the car rental?
